Attention Comprehension	**C4ML Demo:** 1 February 2026 (CGO'26)																																				
	Implement masking																																				
	Benchmark / write up																																				
	Deadline: 17 March 2026 (OOPSLA'26)																																				
Block-Sparse Matrix w RayTrace	Literature review																																				
	Impl: RTSpMSpM in Vulkan / RHI dialect in xDSL																																				
	Impl: Lowering SpMM to RHI																																				
	Impl: Block-sparse GeMM																																				
	Impl: Fusion + Block-sparse attention variants																																				
	Write up																																				
	Deadline: August 2026 (ASPLOS 2026)																																				
	Backup: November 2027 (PLDI 2027)																																				
	Buffer* (Anticipate either of the two papers to delay)																																				
Automated End-to-End Optimizing Compiler for Real-Time Computer Graphics	Literature review																																				
	Impl: Lower render graph to RHI																																				
	Impl: Tiling and Fusion of Render Passes																																				
	Impl: Tiling and Fusion of Multiresolution Mesh Pipelines																																				
	Evaluation, comparison with Taichi																																				
	Deadline: June 2027 (SIGGRAPH Asia 2027)																																				
	Backup: January 2028 (SIGGRAPH 2027)																																				
Thesis Writeup	**Earliest Deadline:** January 2028																																				
	Most Realistic Deadline: May 2028																																				
	Final Deadline: 08 January 2029
